

### Daily CSI China Internet Index Bull 2X Shares

#### Overview

The Direxion Daily CSI China Internet Index Bull 2X Shares seeks daily investment results, before fees and expenses, of 200% of the performance of the CSI Overseas China Internet Index. **There is no guarantee the fund will meet its stated investment objective.**

This leveraged ETF seeks a return that is 200% the return of its benchmark index **for a single day. The fund should not be expected to provide two times the return of the benchmark's cumulative return for periods greater than a day.**

#### Target Index

The CSI Overseas China Internet Index (H11137) is provided by China Securities Index Co., LTD ("Index Provider"). The Index is designed to measure the performance of the investable universe of publicly traded China-based companies whose primary business or businesses are in the Internet and Internet-related sectors, as defined by the index sponsor, China Securities Index Co., Ltd. ("CSI"). A China-based company is a company that meets at least one of the following criteria: 1) the company is incorporated in mainland China; 2) its headquarters are in mainland China; or 3) at least 50% of the revenue from goods produced or sold, or services performed in mainland China. The Index Provider then removes securities that during the past year had a daily average trading value of less than \$500,000 or a daily average market capitalization of less than \$500 million. **One cannot invest directly in an Index.**

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investment. The Direxion Shares ETFs are not designed to track their respective underlying indices over a period of time longer than one day.

**Direxion Shares Risks** – An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with the Fund concentrating its investments in a particular industry, sector, or geographic region which can result in increased volatility. The use of derivatives such as swaps and futures contracts are subject to market risks that may cause their price to fluctuate over time. The Fund does not attempt to, and should not be expected to, provide returns which are two times the performance of the Index for periods other than a single day. Risks of the Fund include Effects of Compounding and Market Volatility Risk, Leverage Risk, Market Risk, Aggressive Investment Techniques Risk, Liquidity Risk, Counterparty Risk, Intra-Day Investment Risk, Daily Index Correlation/Tracking Risk, Other Investment Companies (including ETFs Risk), and risks specific to Chinese securities, such as Chinese Government Risk, Chinese Markets Risk, Chinese Currency Risk. Investment in securities of Chinese issuers involves risks that may be greater than if the Fund's investments were more geographically diverse. The Chinese economy is generally considered an emerging market and can be significantly affected by economic and political conditions and policy in China and surrounding Asian countries. Additional risks include, Consumer Discretionary Sector Risk, Emerging Markets Risk, and risks related to the Information Technology Sector and Internet Company Industry. The market prices of internet securities tend to exhibit a greater degree of market risk and sharp price fluctuations than other types of securities as these securities may fall in and out of favor with investors rapidly, which may cause sudden selling and dramatically lower market prices. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
