

## Monthly 7-10 Year Treasury Bull and Bear 2X Funds

### Overview

The Direxion Monthly 7-10 Year Treasury Bull & Bear 2X Funds seek monthly investment results, before fees and expenses, of 200%, or 200% of the inverse (or opposite), of the calendar month performance of the ICE U.S. Treasury 7-10 Year Bond Index. **There is no guarantee the funds will meet their stated investment objective.**

Direxion's Leveraged Index-based Funds seek to provide monthly returns which are a multiple of the returns of the relevant benchmark. In practice, this means that Leveraged Index-based Funds react to gains by increasing market exposure and react to losses by decreasing market exposure.

### Target Index

The ICE U.S. Treasury 7-10 Year Bond Index (IDCOT7TR) is a market value weighted index that includes publicly issued U.S. Treasury securities that have a remaining maturity of greater than seven years and less than or equal to ten years. Eligible securities must be fixed rate, denominated in U.S. dollars, and have \$300 million or more of outstanding face value, excluding amounts held by the Federal Reserve. Securities excluded from the Index are zero-coupon STRIPS, inflation linked securities, floating rate notes, cash management and Treasury bills, and any government agency debt issued with or without a government guarantee. **One cannot directly invest in an index.**
