

Daily Robotics, Artificial Intelligence & Automation Index Bull 3X Shares

Overview

The Daily Robotics, Artificial Intelligence & Automation Index Bull 3X Shares seeks daily investment results, before fees and expenses, of 300% of the performance of the Indxx Global Robotics and Artificial Intelligence Thematic Index. **There is no guarantee the fund will meet its stated investment objective.**

This leveraged ETF seeks a return that is 300% the return of its benchmark index **for a single day. The fund should not be expected to provide three times the return of the benchmark's cumulative return for periods greater than a day.**

Target Index

The Indxx Global Robotics and Artificial Intelligence Thematic Index (IBOTZNT) is designed to provide exposure to exchange-listed companies in developed markets that are expected to benefit from the adoption and utilization of robotics and/or artificial intelligence, including companies involved in developing industrial robots and production systems, automated inventory management, unmanned vehicles, voice/image/text recognition, and medical robots or robotic instruments, as defined by the index provider, Indxx. Companies must have a minimum market capitalization of \$100 million and a minimum average daily turnover for the last 6 months greater than, or equal to, \$2 million in order to be eligible for inclusion in the Index. **One cannot directly invest in an index.**

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds website at direxioninvestments.com.

Short-term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investment. The Direxion Shares ETFs are not designed to track their respective underlying indices over a period of time longer than one day.

Direxion Shares Risks – An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with the Fund concentrating its investments in a particular industry, sector, or geographic region which can result in increased volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. The Fund does not attempt to, and should not be expected to, provide returns which are three times the return of its underlying index for periods other than a single day. Risks of the Fund include Effects of Compounding and Market Volatility Risk, Leverage Risk, Market Risk, Aggressive Investment Techniques Risk, Liquidity Risk, Counterparty Risk, Intra-Day Investment Risk, Daily Index Correlation/Tracking Risk, Other Investment Companies (including ETFs) Risk, and risks specific to investment in the securities of the Robotics & Artificial Intelligence Companies and Industrials and Information Technology Sectors. Robotics and artificial intelligence companies may have limited product lines, markets, financial resources or personnel. These companies typically face intense competition and potentially rapid product obsolescence. Robotics and artificial intelligence companies, especially smaller companies, tend to be more volatile than companies that do not rely heavily on technology. Please see the summary and full prospectuses for a more complete description of these and other risks of the Fund.
