PORTFOLIO MANAGERS

Brian Demain, CFA
Cody Wheaton, CFA

FEES (%)

	Initial	Service
Gross Expense Ratio (%)	0.81	1.06
Net Expense Ratio (%)	0.81	1.06

Expense ratios for Service Class shares are higher than Initial Class shares due to the inclusion of 12b-1 fees. Expense ratios shown reflect fee waivers, expense reimbursements, or expense recaptures, if any, which are at the discretion of the Investment Manager. Fee waivers and expense reimbursements are included in the Net Expense Ratio only. Expense recaptures are included in both the Gross Expense Ratio and the Net Expense Ratio.

PORTFOLIO CHARACTERISTICS

Net Assets (all share classes)	\$1.02 Billion	Beta (Service Class)	0.80
Number of Holdings	77	Beta (Initial Class)	0.80
Portfolio Turnover (as of 12/31/2022)	17%	R-Squared (Service Class)	82.50
Median Market Cap	\$15.28 Billion	R-Squared (Initial Class)	82.50
Weighted Average Market Cap	\$28.19 Billion	Standard Deviation (Service Class)	18.87
Alpha (Service Class)	2.84	Standard Deviation (Initial Class)	18.87
Alpha (Initial Class)	3.10	Price/Book Ratio	3.47

Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on the indicated class shares at NAV for the 3-year period. **Past performance is no indication of future results.**

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility. **P/B Ratio** is the ratio of the fund's market price to the most recently reported book value for the prior fiscal year.

TOP 10 HOLDINGS (%)

Constellation Software, Inc.	4.48
Boston Scientific Corp.	3.11
GoDaddy, Inc., Class A	3.07
WEX, Inc.	2.83
Intact Financial Corp.	2.67

ASSET ALLOCATION (%)

U.S. allocations may include U.S. territories and possessions. The Net Other Assets (Liabilities) category may include, but is not limited to, repurchase agreements, reverse repurchase agreements, security lending collateral, forward foreign currency contracts, and cash collateral.

INVESTMENT STRATEGY

The portfolio's sub-adviser, Janus Henderson Investors US LLC (the "sub-adviser"), under normal conditions, invests primarily in common stocks selected for their growth potential, and normally invests at least 80% of the portfolio's net assets (plus the amount of borrowings, if any, for investment purposes) in equity securities of medium-sized companies. Medium-sized companies are those whose market capitalization falls within the range of companies included in the Russell Midcap® Growth Index, which as of December 31, 2022, was between approximately \$0.31 billion to \$52.2 billion. The portfolio may also invest in foreign securities, which may include investments in emerging markets, and it may invest up to 5% of its net assets in exchange traded funds.

The sub-adviser applies a "bottom-up" approach in choosing investments. In other words, the portfolio manager looks at companies one at a time to determine if a company is an attractive investment opportunity and if it is consistent with the portfolio's investment policies.

SECTOR WEIGHTS (%)

Information Technology	27.08

The Russell Midcap® Growth Index is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Russell® and other service marks and trademarks related to the Russell indexes are trademarks of the London Stock Exchange Group companies.

Investing in small- and medium-size companies involves greater risk than is customarily associated with more established companies. The securities of small and mid capitalization companies are subject to higher volatility than larger, more established companies. Growth stocks can be volatile and experience sharp price declines and certain types of stocks, especially technology stocks, can be extremely volatile and subject to greater price swings than the broader market.

**All facts, statistics and information presented are those of the underlying portfolio in which the investment option invests. This underlying portfolio is only offered as an investment option within a variable annuity contract.

Variable annuities are long-term tax deferred vehicles designed for retirement purposes. They offer three main benefits: tax-deferred treatment of earnings, guaranteed death benefit options, and guaranteed lifetime payout options. Variable annuities are subject to investment risk, including possible loss of principal.

The value of the variable annuity will fluctuate so that when surrendered, it may be worth more or less than the total of premium payments. Past performance is no guarantee of future results.

A number of investment options, or subaccounts, are available under the variable annuity.

There are other investment choices available with different management fees associated with each choice.

The COVID-19 pandemic has caused substantial market disruption and dislocation around the world including the U.S. During periods of market disruption, which may trigger trading halts, the fund's exposure to the risks described elsewhere in the prospectus will likely increase. As a result, whether or not the fund invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the fund's investments may be negatively affected.

You should consider a variable annuity's investment objectives, risks, charges, and expenses carefully before investing. Go to www.transamerica.com for prospectuses containing this and other information. Please read them carefully.
